

BIZCOURIER WEB SERVICES

Dear Partners,

We would like to inform you that BizCourier can now offer you the ability to create new Shipments directly from your company's software or website by taking advantage of BizCourier Shipment Creation Web Service.

Requirements	
Method	Description
newShipment	Creates a new shipment according to the authentication data provided plus the shipment's data. Returns an array as a result with the basic data of the shipment and / or possible errors

Details - Clarifications

- * If you do not know any of the authentication data, BizCourier can inform you if you send us an email to info@bizcourier.gr with Cc to support@bizcourier.com.gr
- ** Field R_PC is mandatory; hence, the shipment will not be created if the Postal Code is left blank.
- *** Size Fields (Width, Length, Height) are calculated in cm and the values must be integers. The volumetric weight of the shipment is calculated according to the dimensions provided.
- **** If the Cheques on Delivery or Cash on Delivery fields are different than 0 then the shipment will be charged for the Extra Charge of Cash on Delivery.
- ***** If the SMS field has the value "1" then the shipment will be charged for the Extra Charge of SMS.
- ***** All empty fields are automatically assigned with the value of "0" except Size and Weight Fields that take the value "1".
- ***** String Fields R_Name, R_Address, R_Area, Comments have to be UTF-8 ENCODED.

In numeric fields, the decimal delimiter character is a dot " . "
